

Professional Summary

Aspiring Software Engineer and Computer Science student with hands-on experience in Web3 development, Full-Stack applications, and Data Analytics. Proven ability to build decentralized applications (dApps) and RESTful web services. Adept at leveraging modern frameworks like React and Spring Boot to solve complex problems. Strong background in AI-driven data strategy and cloud architecture (AWS).

Technical Skills

- **Languages:** JavaScript (ES6+), HTML5, CSS3, Java, Solidity, SQL
- **Frameworks/Libraries:** React.js, Spring Boot, Hardhat, Truffle
- **Tools & Technologies:** Git/GitHub, AWS (Elastic Beanstalk), IPFS, REST APIs, JSON
- **Data & AI:** Data Visualization, GenAI Powered Analytics, Exploratory Data Analysis (EDA)
- **Soft Skills:** Strategic Thinking, Agile Collaboration, Problem Solving, Technical Documentation

Technical Experience & Simulations

Web3 Workshop Hackathon — Participant March 2025 – Present

- Developed a Decentralized Prediction Market using Solidity and smart contracts to ensure transparent, secure event participation.
- Engineered an NFT Art Generator automating minting with ERC-721/1155 standards and IPFS for decentralized storage.
- Collaborated in a fast-paced environment using Hardhat and Ethereum workflows to deploy functional dApps.

Tata Consultancy Services (via Forage) — Data Visualization Intern Jan 2025 – Present

- Synthesized complex datasets into visual dashboards to support leadership decision-making.
- Facilitated stakeholder communication through strategic briefing preparation.

AWS (via Forage) — Solutions Architect Intern Jan 2025 – Present

- Designed scalable hosting architecture using AWS Elastic Beanstalk to reduce latency and support growth.
- Authored technical proposals translating cloud architecture into business-friendly insights.

Tata Group (via Forage) — GenAI Data Analytics Simulation Sep 2025 – Nov 2025

- Conducted EDA using Generative AI to identify risk indicators and improve data quality.
- Designed AI-driven collection strategies incorporating ethical AI and automation.

Hewlett Packard Enterprise (via Forage) — Software Engineering Simulation Dec 2024 – Jan 2025

- Built a Java Spring Boot web server handling employee data via REST APIs and JSON.
- Developed unit test suites ensuring application reliability and performance.

Education

• **Bachelor of Technology in Computer Science**
University of Engineering & Management, Jaipur Expected July 2028

• **Higher Secondary (PCM)**
NIOS, Kolkata June 2024
GPA: 67.80%

• **Secondary Examination**
Ramakrishna Vivekananda Mission Vidhyabhaban June 2021
GPA: 68.71%

Certifications

- GenAI Powered Data Analytics (Nov 2025)
- Solutions Architecture (Jan 2025)
- Software Engineering (Jan 2025)
- Data Visualisation (Jan 2025)
